This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

GENERAL REVIEW.

CHICAGO, December 31, 1892.

MR. CHARLES D. HAMILL, *President, Board of Trade of the City of Chicago:*

SIR:—Herewith I have the honor to hand you the thirty-fifth annual report of the Board of Trade of the City of Chicago.

The year just closed has been in many respects an eventful one in its commercial aspects. The national commercial policy has been distinguished by a reciprocal character, and by the recognition of the highest idea of commerce, domestic and foreign, viz.: concession of rights in the markets of the world to all, as the basis of mutually profitable trade relations. In the domain of commerce as in the purely intellectual and moral realms, no accessions are possible without concessions. A policy founded upon the idea of acquiring permanent advantage at the same time of withholding benefits is delusive, unsound and destructive. That the national perception is waking to this truth, which has in this country slumbered for a long time, is an event pregnant with significance. Our trade relations with South America have greatly increased under this policy, which has so commended itself to the national judgment that one may hope for its extension to other nations without abruptly changing existing conditions.

Nothing has occurred during the past year to seriously mar the general prosperity, which in an exceptional degree has characterized the trade of the United States. Save the Homestead troubles, which resulted from local causes, there have been peaceful and profitable relations between labor and capital throughout the country.

The crops of the land have been abundant and have on the whole yielded fair returns to the farmer. This is especially true of the coarse grains. We cannot by any legislation or system of business escape from, or be independent of, the absolutely controlling factor with respect to our wheat, that the price of this cereal is determined by its export price. This is true of the wheat

product of all surplus wheat producing countries. We enter the markets of those countries which do not raise a sufficient quantity of this grain to feed their own populations, and successfully compete for its sale. That we are able to do this without curtailing the requirements of civilized labor is a splendid commentary upon the enterprise and ingenuity of American merchants, exerted in an almost infinite variety of ways, such for example as in the line of transportation, in agricultural machinery, in economical methods, in plans affecting inspection, storage, insurance, and in bringing buyers to the great markets at their own expense, which is made possible by such commercial associations as the Chicago Board of Trade. This institution, the careful and unprejudiced student must concede, without a shadow of doubt, has addressed itself from its very inception to constantly arising contingencies and problems, with conspicuous success. To be sure there are those who deny the truth of this proposition. But who are they? They are those who are ignorant of the true relation which commercial bodies sustain to the manifold industries of the land, or who are actuated by a desire to pamper the spirit of unreasonable fault-finding which may be easily found, and more easily fanned into inflamed exasperation, and made use of for political prominence.

This unholy and base desire springs from an unprincipled greed for office, alas, too prevalent in our country, and is absolutely demoralizing.

Those objectors are also found among those who are buyers of the products which boards of trade market, and who want the market exclusively to themselves, or who in some instances are working for foreign capitalists, with whom their financial interest to a very considerable extent is closely identified. That such buyers of product should for one moment have any standing on this point with those from whom they purchase is passing strange. It is only accounted for by the fact that mankind, especially in this age, are bent on gain, and at first are easily infatuated, and without thought, by any scheme which claims to enrich them. They become dupes to most unreasonable propositions, provided such propositions profess to make money, as the saying is.

The history of the world is replete with instances of victimizing men by schemes whose absurdity shames the most ordinary intelligence. The surest way to bring about commercial disaster and chaos is to play upon the credulity of man by, in a loud-mouthed

way, exaggerating his disadvantages and making light of his benefits. All that is necessary to do this is a crop of demagogues, and these are in constant supply as this is a crop that never fails.

The Hatch and Washburn bills have throughout the year menaced that great commercial system whereby the great crops of the country have been marketed, regardless of the volume of receipts, which, particularly at harvest time, are inevitably greatly in excess of the consumptive demand, without undue depreciation of prices. By this system the wants of the agriculturalist have been met, obligations, small and great, have been promptly discharged, and sales effected at prices warranted by true and prevailing legitimate conditions the world over, bringing prospective demands and supplies as ever present factors in the determination of prices.

In the administration of this system boards of trade stand for equity, and gather for both buyer and seller that great fund of official information from all quarters of the world, without which unstable prices and violent fluctuations would seriously and perhaps disastrously disturb widespread conditions.

Happily the disaster which those measures threatened has been thus far averted, and the vast business fabric, the result of years of experience, stands firm and unimpaired. The country is indebted to the sagacious and unremitting efforts of its great commercial organizations which with marked ability are co-operating to defeat the Hatch and Washburn bills.

Eminent lawyers in both houses of congress clearly exposed the unconstitutionality of those pernicious bills, whose title pages bore an unblushing falsehood. They were heralded as bills for revenue when even the most ardent and unscrupulous of their advocates had not the effrontery to claim that under their intricate provisions they expected to collect one cent of revenue. Never before was the intelligence of congress so grossly and systematically insulted as by the introduction of those infamous bills. They will be relegated as they deserve to the rubbish of two sessions of congress, costing in their discussion, and in the disturbance which they will have created, millions to the varied industries of the country.

Fortunately indeed for the farmer that the efforts of his professed friends have not prevailed. The agitation of the subject resulted, instead of impressing upon the public the defects of the system of buying and selling for future delivery, in emphasizing its excellencies and its necessity for the unhindered and favorable marketing of the grain, cotton and tobacco crops, and has shown

that its principles permeate every phase of commercial activity, and that it is essential to the proper conduct of every industry; and that, moreover, it is the greater adjuster of prices in the interest of producer and consumer alike.

The commercial record of the year is one which discloses in a special manner a year of widespread prosperity. Not that there have not been instances and brief periods which have been marked with more or less commercial solicitude. This solicitude has not affected the generally favorable record.

The anxiety of the country inseparable from the uncertainties and excitement of a presidential campaign has interfered comparatively little with the prosecution of its material industries. Never before in a commercial sense has the country been less disturbed by a change of administration of the government than during the past year. With remarkable alacrity the divers business interests of the country have adjusted themselves after the absorbing interests of a presidential campaign.

The crops of the country, which constitute the basis of all departments of business, have been large, and have given to the grain receivers a great volume of business, which has been fairly remunerative. It is regretted that this prosperity has not been generally diffused, and that the business connected with the board has exhibited the prevailing tendency of the principal industries to concentration and monopoly, so that the comparatively small merchant has not met with that full participation in the advantages resulting from the heavy receipts of the year which he had a right to expect.

However, notwithstanding this fact, owing to good crops and a fair stock left over from the preceding year, together with the exceptional advantages of Chicago as a grain market, all who have received carlots of grain on commission have had at least a reasonably prosperous year.

The business of buying and selling for future delivery was unsatisfactory throughout the year. Never was the speculative business of this board so harrassed. Legislative meddling, silver discussion, unfavorable weather conditions early in the year in the winter wheat belt, despondent foreign markets occasioned by heavy stocks purchased at high prices, heavy failures in prominent continental markets, steady accumulations of grain at easily accessible points for shipment, not only disturbed, but subdued the markets all over the world, and speculators grew

weary waiting for business and distrustful of indications which under normal conditions would have infused animation to trade.

Every attempt to advance prices of wheat, the leading speculative cereal, was unsuccessful, and farmers rushed their grain to market, even while expecting the Hatch bill to become a law. They had joined the tirade against speculation, and could not withdraw, but however plausible the arguments of politicians they knew that there was no hope for better prices should the Hatch heresy succeed. Hence the volume of receipts of grain at this great center was limited only by the capacity of transportation facilities to bring it hither. This was the expression of the farmers' opinion of the Hatch bill, representations made in Washington to the contrary notwithstanding.

The great crops of the country, comprising wheat, corn, oats, rye and barley, aggregated in volume 2,897,747,000 bushels, valued at $1,227,906,023, as against 3,518,328,000 bushels in 1891, valued at $1,648,266,206.

The number of animals on the farms of the country, including horses, mules, milch cows, oxen and other cattle, sheep and hogs, according to the official estimate was 164,284,573, valued at $2,483,506,681, against 169,216,813, valued at $2.461,755,678 in 1891, showing a decrease in numbers, but an increase in value.

The total estimated value of farm animals and of the crops of the principal grains for the last year was $3,711,412,704, against $4,110,021,884 for 1891. This enormous sum is the basis of prosperity in the west, and is the sufficient warrant for the prosecution of manifold business relations between the chief centers of trade and the vast territory of the Mississippi valley. The merchant and manufacturer, the railway company and the great water transportation lines, the banker and the citizen feel the mighty impulse of the fact and see in it their abundant security and confidence. Bank and transportation stocks are sustained, labor and the value of manufactured products are maintained, the ambition and impetus of the individual are inspired to constant effort, and the tremendous powers of human industry and thought are enlisted to increase the acquisitions of American diligence and ability.

The cotton crop is stated by high authority at 8,600,000 bales. Shipperson of New York estimates the United States consumption for the season ending August 31st as 3,039,000 bales (of 400 pounds each), being 225,000 bales in excess of that for the preceding season. The yield this season, 1892-93, is estimated at 6,500,000

bales. The export price for the year is 8.7 cents, the lowest during thirty-seven years.

That so large a proportion of this staple raised in our country is manufactured in foreign lands, which derive large revenues from the sale and transportation of a great variety of its products, is to be deplored. Feeding English factories with raw material, and buying from those concerns a large part of their product, is a humiliating commercial fact for us to consider. We should remedy this state of things by increasing the cotton manufactories at home and by securing within our borders the profits which now go to foreign manufacturers. This fact addresses itself with peculiar emphasis to the southern states, to whom these profits especially belong.

The corn crop aggregated 1,628,464,000 bushels grown on 70,626,658 acres and valued at $642,146,630, against 2,060,154,000 bushels produced on 76,204,515 acres, valued at $836,439,228 in 1891, and 1,489,970,000 bushels on 71,970,763 acres, valued at $754,433,451 in 1890. The crop for 1889 was the largest ever raised and aggregated 2,112,892,000 bushels, the product of 78,319,651 acres, but valued only at $597,918,829, or about $46,000,000 less than the value of the crop for 1892.

Iowa is the peerless corn state, devoting over 7,000,000 acres to the cultivation of this grain, yielding more than 200,000,000 bushels, valued at $64,070,566. The great state of Illinois, with its wonderful variety of products, stands next with 165,327,000 bushels, representing $61,171,098. Nebraska, Missouri, Kansas, Indiana, Ohio, Texas and Kentucky follow in the order of production, all these states constituting the great maize yielding territory of the United States, contributing in a special and significant manner to the national wealth. While this grain is grown in all sections of our country, and while no soil however forbidding refuses to send up this golden fruitage, it abounds in most generous measure in our western and northwestern areas. It attracts the finest populations and by its industrious, healthful and rewarding influences gathers the highest types of family and neighborhood prosperity.

Its average production this year, per acre, was 23.1 bushels, which exceeds that for 1890, 1887, 1886 or 1883. Its average value per bushel was 39.3 cents. Its value per acre was $10.18, which has been exceeded but twice in ten years.

The following table gives the corn production and exports of each year from 1870 to 1891, inclusive:

Our crop of wheat aggregated 515,949,000 bushels produced on 38,554,430 acres, valued at $322,111,881, against 611,780,000 bushels, grown on 39,916,877 acres, valued at $514,478,711 in 1891. A detailed statement of this crop may be examined in the statistic portion of this volume. The crop for the year 1891 was the lar est on record; the yield was 15.3 bushels per acre, the average value per bushel 83.9 cents and the average value per acre $12.86. The yield per acre of the crop of 1892 was 13.4 bushels and the value per bushel 62.4 cents.

From the same authority from which these statistics are derived, viz: the United States Agricultural Department, the following table is subjoined, showing, in the language of the statistician, a test of the consistency, if not accuracy, of wheat estimates for the past eleven years:

The consumption as stated in the above table is based upon 4⅜ bushel per capita, a rate fixed upon in 1878 after thorough and careful investigation of the differing consumption of different sections of the country, and is a fair average. The reasonableness of this basis has never been disputed.

The record of exportation shows a surplus of 128,334,791 bushels annually, or 28 per cent. of the product. It further discloses the fact that the exportations for the past five years have been greater than for the years immediately preceding.

The value of our foreign commerce, including imports, exports and on transit trade, during the fiscal year ended June 30, 1892, was $1,996,816,084, against $1,844,392,840 during the corresponding year of 1891. The value of what is termed in transit trade was $139,135,474 and should not be considered a part of the value of our foreign commerce. The country merely derives from the

merchandise which this amount represents, the transportation charges incident to the carriage across American soil and upon American waters.

The value of our imports of merchandise amounted to $827,-462, against $844,907,117 in 1891, and that of our exports of domestic merchandise to $1,015,732,011, against $872,270,283 in 1891, $845,293,828 in 1890 and $730,282,609 in 1889.

The following table taken from the report of the Chief of the Bureau of Statistics shows the imports and exports for each year from 1881 to 1892, inclusive, and the increase or decrease in the imports and the total values thereof for each of the years included:

a Excess of imports.

Our commerce with the United Kingdom is larger than that with any other power, it being 35.3 per cent. of our commerce with all nations, and 53 per cent. of our trade with Europe. Of our entire exports 82.82 per cent. went to Europe, representing in value $841,087,922.

The products of agriculture furnished 78.69 per cent. of our domestic exports. Breadstuffs, raw cotton, provisions, including meat and dairy products, and leaf tobacco, comprise 94 per cent. of the value of the products of agriculture exported.

The exports of domestic gold and silver amount to $60,086,418, against $98,973,265 in 1891 and $35,783,189 in 1890.

The following official statement is submitted, showing the value of our exports of provisions, exhibiting the course of commerce in bacon and hams, pork, lard, meat and dairy products since 1860:

Our exports of cotton amounted in value to $258,461,241; of breadstuffs to $299,363,117; of provisions, comprising meat and dairy products to $140,362,159, and of cattle, sheep and hogs to $35,624,281.

Our imports during the fiscal year amounted in value to $827,402,462, against $844,916,196 in 1891 and $789,310,409 in 1890. The increase in the value of free goods over those imported in 1891 was $91,758,306, and the decrease in the value of dutiable goods was $109,272,040, caused mainly by the transfer of sugar from the dutiable to the free list.

The value of our imports with those countries with which we have established reciprocal commercial relations has increased since the date when such relations were established $84,294,525, and it is a specially gratifying feature of this fact that this increase is from trade with American countries. The increase in the value of our trade with Brazil is particularly noticeable, being $76,384,581 during the eighteen months since reciprocity went into effect, as compared with the corresponding statistics for the eighteen months which immediately preceded. Our imports from American countries consist mainly of sugar, india rubber and crude drugs,

articles of necessity which cannot be procured from other parts of the world, at least as cheaply.

This enlightened policy should be extended under conservative directions, along parallels of latitude as well as those of longitude.

In this connection it is considered advisable to preserve the dates when United States hog products were admitted into those countries from which they had been excluded:

Denmark, on September 8, 1891, admitted "pork and other unmanufactured swine products, inclusive of swine bladders and unpurified steamed lard."

Germany, on September 3, 1891, admitted "swine, hog meat, and sausages of American origin."

France, on January 1, 1892, admitted "salted pork meats."

Italy, on October 17, 1891, admitted "swine flesh, prepared and preserved." The value of such exports to Italy during the eleven months ending August 31, 1892, was $5,432.

Austria-Hungary, on December 4, 1891, admitted "American pork." There were no exports of pork to Austria-Hungary during the nine months ending August 31, 1892.

Spain, on May 21, 1892, admitted "pork, with certificate of origin and inspection, grease obtained by fusion, and lard without flesh." All grease prepared by action of fire, and fat bacon, are exempt from inspection. The value of such exports to Spain during the month of August, 1892, amounted to $148.

The proportion of American to foreign vessels entered in our foreign trade during the last five years has remained without material change, the foreign tonnage representing 78.8 per cent. in 1887, 78.1 per cent. in 1888, 76.7 per cent. in 1889, 77.5 per cent. in 1890, 75.9 per cent. in 1891, and 75.9 per cent. in 1892 of the total tonnage entered in that trade.

The hope expressed in the last review that the agitation of the subject of immigration, and the official investigations which for many years have resulted from this agitation, would bring about such amendments to our immigration laws as would prohibit an immigrant from landing, unless he or she produced a certificate of requisite physical and moral character from the proper authorities, duly countersigned by a United States consul, has been realized. Such amendments to our immigration laws were made during the last congress, and the incomparable advantages of citizenship in this country will be conferred only upon those who have passed an examination as to their fitness to receive such privileges.

The number of immigrants arrived in the United States during the last fiscal year, was 623,084, of which 237,303 were females and 385,781 were males, the larger part being from fifteen to forty years of age, and only 42,079 over forty years old.

The receipts of grain and of flour in its grain equivalent at Chicago during the year 1892 aggregated 255,832,556 bushels, showing the enormous increase over the corresponding figures for the year 1891 of 24,011,127 bushels, and being by far the largest quantity of grain ever received in this city.

The shipments aggregated 216,182,008 bushels, against 207,987,762 for the previous year.

The shipments of corn aggregated 66,104,220 bushels; of oats 67,332,322 bushels; of flour 5,710,620 barrels; of wheat 43,833,795 bushels. The week of the largest receipts of flour and grain was that which ended on the 8th of October, and aggregated 10,919,280 bushels. The week of the largest shipment was that which ended on the 16th of April, when 7,999,931 bushels were shipped.

The storage capacity of grain elevators declared regular elevators under the rules of this board is 30,325,000 bushels. A statement showing the capacity, designation and location of these elevators, together with the rates of storage, may be found on page 36 of this report. The largest quantity of grain in store in Chicago during the year was 20,147,000 bushels on November 5th.

The receipts of live stock during the year comprised 7,714,435 hogs, 3,571,796 cattle, 2,145,079 sheep, 197,576 calves, 86,998 horses, aggregating 13,715,884 animals, valued at $253,836,502, received in 309,901 cars. The valuation of our receipts of live stock for twenty-seven years amounts to $3,701,252,727.

Of dressed beef Chicago received 149,496,436 pounds during the year, and shipped 1,212,344,343 pounds.

Our receipts of lard for the year aggregated 68,371,502 pounds and the shipments 398,915,558 pounds.

The mere enumeration of these figures is but an inadequate expression of the extensive volume of business transacted here in live stock and provisions. It, however, cannot fail to forcibly remind even a casual reader that the thoroughness and excellence with which this business is carried on commends Chicago to all markets of the world as a supply market for provisions. No such figures could be possible, were it not that here unequaled facilities have been created for supplying at reasonable cost excellent meat food to all parts of the world. Transportation and

storage facilities, both including every device for the rapid carriage and preservation of meats, are inseparable from the magnitude of this industry. As quality and cheapness of food have been attained, the demand for excellent meat product has correspondingly increased. This has resulted in greater care in the raising of stock, so that the quality of our farm animals is constantly improving. All these features of the trade explain the success of Chicago merchants in food products in competing with all other markets.

Fortunately indeed, with respect, not only to this business, but that of other departments of trade, Chicago possesses transportation facilities on account of her geographical position alone, which cannot by any possibility be enjoyed at any other port. The growth of this trade and of the grain trade is constantly demanding swift transportation at low cost, both by land and water. There is throughout the season of navigation a constant demand for all vessels, however large, which ply the waters of the great lakes. The urgent necessities constantly arising from the enormous crops of this country and the probability of their volume being speedily increased, have turned the attention of scientific and mercantile minds to the desirability of establishing an uninterrupted deep water way from the great lakes to the Atlantic.

This urgency has found expression from time to time through the efforts of this board in congress and in conventions of citizens for promoting and completing the magnificent plan of deep water route to the sea. Congress has realized the importance of beginning and completing this work, and has ordered surveys to be made and submitted for its consideration. The people of the country will not be slow to urge upon their representatives decided and prompt action looking to the completion of this work. This project has been repeatedly dwelt upon more or less at length in the annual reports of this Board for several years.

The receipts of grass seed, including flaxseed, during the year aggregated 62,702,603 pounds, and the shipments 69,472,955 pounds.

The receipts of hides aggregated 110,082,233 pounds, and the shipments 229,711,358 pounds.

Of lumber Chicago's receipts aggregated for the year 1892, 2,203,874,000 feet, and the shipments 1,060,017,000 feet; of shingles 395,206,000 were received and 140,227,000 were shipped.

The receipts of butter aggregated 134,196,828 pounds, and the

shipments 140,494,155 pounds, against 127,765,048pounds received and 140,737,620 pounds shipped in 1891.

The receipts of cheese during the year aggregated 64,252,364 pounds, and the shipments 47,665,127 pounds.

The detailed statements of these receipts and shipments may be found in their appropriate places among the statistical tables of this report.

The volume of speculative grain business of Chicago during the year is indicated by the Chicago Board of Trade Clearing House. The total clearances for the year amounted to $69,295,-992.62, against $104,083,529.67 in 1891 and $86,627,157.25 in 1890. This feature of the business was much lighter than since 1889, and in connection with the low prices which have prevailed, and the uncertainty given to the trade by the agitation of threatened legislation, is strikingly significant. The heaviest transactions occurred in September and October, and the lighter business prevailed in January and February.

The total bank clearances for the year amounted to $5,135,771,-186.74, against $4,456,885,230.49 in 1891.

Upon page 118 of this report may be found a statement of the bank clearances, by months, from 1887 to 1892, inclusive.

The aggregate capital of the national banks in this city amounted to $23,300,000, and of the State banks $12,577,000. Upon pages 120 to 123 may be found detailed statements of the official returns of Chicago's banks, both State and National.

The number of vessels arrived during the year at the port of Chicago was 10,556, representing a tonnage of 5,966,626 tons, and cleared 10,567, representing a tonnage of 5,968,337.

Chicago has an area of 180.2 square miles or 115,328 acres, and a population of 1,500,000. The total bonded indebtedness of the city is $18,476,450. The total value of real estate, buildings, etc., owned by the city is $41,390,366.63. There are 2,370 miles of streets in the city, of which 879 are paved; 3,931 miles of sidewalks, 992 miles of sewers and 1,402 miles of water mains. During the year there were recorded transfers of real estate valued at $180,892,364; 13,194 buildings erected, valued at $64,740,800. Chicago has 325 public schools, having an average attendance of 137,266 children daily, and 52 night schools with an average attendance of 13,391. In these schools are employed 3,782 teachers. The average number of children attending private schools in the city is 72,256 and there are 2,048 teachers employed.

There are 2,900 men employed on the police force and 1,012 men in the fire department.

LIVE STOCK AND PROVISION TRADE.

Chicago as the largest market in the world for live stock is in no danger of losing its pre-eminence. Every portion of the west as naturally as rivers find their way to the ocean, sends to this entrepot its farm animals. In no other market can they be so promptly and economically handled, and nowhere else can they meet daily so extensive a buying attendance. Both foreign and domestic buyers here, to a much greater extent than elsewhere, seek their meat food. No market on the globe can compete with the facilities which in their adaptability to varied demands in regard to cuts or forms are here provided. These in detail have been brought about by a personal knowledge of the tastes and preferences of both domestic and foreign trade.

The opportunities, the ability, the sagacity, the enterprise, the capital represented in this mammoth industry are equal to the demand for this product, in what form and volume soever that demand may appear. To the remotest parts of the earth, in camp, on board ship, in the home of the lowly and upon the table of the wealthy are found the hog and beef products prepared in the great packing establishments of this city.

In addition to the home demand for our cattle, that from abroad has been unusually good and continuous. There was rather a plentiful supply of half fat cattle and cows, which depressed the level of prices, sometimes disappointing to producers. The year as a whole was a fairly satisfactory one for the sale of good stock.

The highest prices during the year were realized at its beginning, when native farm-fed steers sold at $5.75 to $6.00 per 100 pounds. From this point prices declined to $4.50 to $4.65 in April. A recovery soon set in, and in July sales were made at $5.00. From this time the market was well sustained, and during the fall and early winter the market ranged from $5.60 to $6.00, with a few sales at $6.10.

There was no complaint of quality, though some of the Texas stock was rather lean on account of drought in that State. Prices for stock cattle from Texas ruled low, sales being from $3.50 to $3.75.

The receipts of live hogs for the year numbered 7,714,435, against 8,600,805 in 1891, 7,663,828 in 1890, 5,978,526 in 1889

and 4,921,712 in 1888. The shipments numbered 2,926,145, against 2,962,514 in 1891, 1,985,700 in 1890, 1,786,659 in 1889 and 1,751,829 during 1888.

The decrease in the supply of hogs as compared with like receipts in 1891 resulted in a rapid advance in prices as soon as this decrease was realized. Owing to the exceptionally large volume of receipts in 1891, the effect of the smaller supply this year did not until the latter portion of the year produce any decided advance.

Late in the autumn, when the activity of the packing season began the highest prices prevailed, and $6.80 was reached. A brisk shipping demand imparted additional strength to the market, and then was made painfully apparent to the short seller that the market was controlled by heavy houses who foresaw the situation and reaped large profits.

The reduced supply was due to very wet weather in the spring, producing great mortality among pigs. In addition, a strong foreign demand for our hog product visited the market, largely ascribed to the present method of a rigid inspection under the supervision of the Department of Agriculture. Our exports of hog product reached $85,116,566 for the fiscal year ending June 30, 1892, as compared with $84,908,698 for the same period during 1891. Prices ranged from $4.10 to $6.80 per 100 lbs. for good to select droves.

The receipts of sheep numbered 2,145,079 against 2,153,537 in 1891, 2,182,667 in 1890, 1,832,469 in 1889, 1,515,014 in 1888, 1,360,862 in 1887 and 1,008,790 during 1886. The shipments numbered 483,368, against 688,205 in 1891, 929,854 in 1890, 711,315 in 1889, 601,241 in 1888, 445,094 in 1887 and 266,912 in the year 1886.

The market for sheep was, while not specially profitable to the producer, fairly satisfactory. Mutton of fine quality uniformly commanded good prices. Droves of ordinary and poor quality were at times throughout the year sold at very low figures. These characteristics of the market soon created an urgent demand for stock sheep which were sold at extreme prices. Sales were made during the year at from $2.25 to $3.00 for very inferior lots, and from $3.50 to $4.00 was paid for choice lots desirable for feeding. Superior grades ranged in price from $5.25 to $8.25, the latter figure being realized in the month of May. The months of largest receipts were those of October and November.

The receipts of horses numbered 86,998, against 94,396 in

1891, 101,566 in 1890 and 79,926 in 1889. The shipments aggregated 74,368, against 87,273 in 1891, 94,362 in 1890 and 73,311 in 1889.

During the month of March we received 10,532 horses in 706 cars, which was the month of largest receipts. The trade in these animals was decidedly satisfactory throughout the year. Extensive sales were made at public sale barns outside of the stock yards, and the aggregate sales were greatly in excess of those of any year, probably reaching nearly 145,000 head. Draft horses sold at from $135 to $155; those for general use at from $100 to $120; those adapted for carriage teams at from $340 to $380; saddlers from $100 to $150, and what are termed streeters at from $95 to $110. The estimated value of our total receipts of these animals for the year was $9,569,780.

All these figures are given, in order that one may see at a glance the uniform and substantial growth of the business of this city in the live stock and provision trade. What all this means in Chicago's prosperity may be easily discerned. Labor, banking, capital, transportation, real estate feel the pervading impulse, and an intense commercial vitality arouses the dormant energies of remote sections in the far west. Each year brings fresh evidence of the ambition imparted to the agriculturist by the wonderful development of business in this metropolis.

The business transacted in mess pork exhibited all the phases which attach to speculative activity. Detailed statements of prices may be found in the statistical portion of this report. The opening sales of the year were made at $10.30 to $10.50 per barrel, steadily improving without special features during the month of January until $11.80 was reached. Prices reacted in February, and speculative interest abated, the closing quotations in that month being $11.17½. This reactionary movement continued into March, prices ranging in this month from $9.80 to $11.27½. Speculation kept aloof in April and prices still further settled until $9.25 was reached, prices sagging during that month, showing an apparent indifference to the market. In May a pronounced advance in prices of corn occasioned by bad weather turned attention to hogs and hog product. Speculation entered the market and animation took the place of indifference and comparative stagnation, and prices advanced to $10.85 on the 30th of May. From this date to the close of the year the market was one of special interest, based upon the fact, accepted at this time by only one or

two large provision firms, that the supply of hogs was short. As this fact was gradually gaining general acceptance the market acquired added strength, until something like consternation was evident among the short sellers.

In November the interest grew into excitement, and large profits went into the pockets of those sagacious men who had forecast the future and held heavy holdings. The highest price of the year was $14.85 per barrel on December 16th. The quotation on the last day of the year was $14.40 per barrel, against $7.70 in 1891.

The total exports for the fiscal year aggregated 80,714,227 pounds, valued at $4,822,295, against 81,317,364 pounds, valued at $4,787,342 in 1891. The exports for the year ended December 31st, 1892, aggregated 77,049,348 pounds, valued at $4,869,224, against 74,332,946 pounds, valued at $4,410,786 in 1891.

The receipts of lard for the year aggregated 68,371,502 pounds, against 74,021,945 pounds in 1891, 147,475,267 pounds in 1890, and 99,952,688 pounds in 1889.

The shipments for the year aggregated 398,915,558 pounds, against 362,109,099 pounds in 1891, 471,910,128 pounds in 1890, and 395,838,737 pounds in 1889.

The exports from the United States for the fiscal year aggregated 460,045,776 pounds valued at $33,201,621, against 498,343,927 pounds, valued at $34,414,323 in 1891.

The chief features of the lard market were similar to those which have been described as having pertained to the pork trade, and prices were controlled by those who believed in higher values, and who had the short seller completely in hand, not by any scheme or manipulation, but simply by virtue of a wise foresight, the result of a studious attention to the facts concerning supplies and a steady adherence to logical conclusions, uninfluenced by any erratic exhibitions of the market.

The year opened with sales at $6.00 per 100 pounds, ranging but about 45 cents throughout the month. February brought no material change in values. During the latter portion of March the market was weak, and prices touched $6.10, closing in that month at $6.15 to $6.20. April and May passed without anything in the trade worthy of comment. In June we had a decided improvement and sales were effected at $6.90 per 100 pounds. July came corroborating the facts which were announced in the previous month, and prices reflected the significance of those facts. From this time they profoundly impressed the short seller, and in

August $8.15 was reached. A slight cholera fright knocked something off of prices in September, and $7.15 was quoted on the 4th of that month. A sharp demand came in October, the cholera scare being absent, and sales were made as high as $9.00 per 100 pounds, closing at $8.30 to $8.60 on the 31st of that month. November came flushed with excitement and very nervous. Prices during this month ranged between $7.70 and $12.00, discomforting the inconsiderate short seller. December was less nervous, though to the very close of the year the "longs" held the market, and made out the daily program without consulting the conveniences of those on the other side. The year departed quoting as it fled $10.50 per 100 pounds for cash lard.

The trade in short ribs partook of the general character of the trade in other hog products, the values and features of which are hereinbefore described. Sometimes the prices did not keep pace with pork and lard, and again they were in advance. The plan of the campaign was directed by the masters of the situation. The daily prices throughout the year may be found in the statistical part of this volume. Prices ranged from $5.10 to $8.50, and averaged $6.85 per 100 pounds, against an average price of $5.90 the year before. The lowest price occurred in January and the highest in December.

WHEAT.

The wheat market throughout the year was unsatisfactory. The Hatch bill was constantly overshadowing it, and affecting it, according to the various phases of congressional discussion of that measure. The fear of its passage prompted traders to have their business well in hand, and commission merchants counseled extreme caution on the part of their customers. Hence the volume and extent of speculation was greatly restricted. At times during the year the market was influenced by official estimates of the crops, diplomatic correspondence, the Chilian complications, financial disturbances, heavy receipts of grain, car famine, eagerness of farmers to market their crops, notwithstanding that they were assured the Hatch bill would pass and improve prices, and steadily large accumulations of wheat in the great grain centers. These were the principal elements which characterized the market and brought about the fluctuations disclosed by the detailed statements of prices which may elsewhere be found.

There was nothing in the reports from the great surplus wheat

producing countries calculated to impart firmness to American markets. The general situation suggested to foreign markets no anxiety regarding ample supplies, and there was not the least persistence in foreign orders.

Sales in January of the contract grade of wheat ranged from 84½ to 90 cents per bushel. A reaction came in February occasioned by crop damage, and a revival of foreign orders, which advanced prices in the latter part of that month to 91⅞ cents. The March market did not sustain the improvement, owing to renewed predictions of the passage of the Hatch bill, failures of foreign firms and favorable bulletins from the government agricultural department. During the month prices ranged from 77¼ to 89⅝ cents without sudden changes.

In April the opening sales were made at 76⅝ to 79 cents. A firmness soon visited the market which produced but a temporary advance in prices. After the first week had passed, weather and government reports were the only influences at work affecting the market, save those of the Hatch bill, which hung over the market like a pall without interruption, inflicting irreparable injury upon the business of the United States. The closing quotations of the month were from 80¼ to 81½ cents per bushel.

No marked change occurred in May. During the latter part of the month there were some indications that the Hatch bill would be defeated and prices advanced to 85¼ cents on the 28th.

In June, after the 9th, prices steadily declined. The Hatch bill, in the absence of many members of congress at the National Republican Convention in Minneapolis, passed the House, and from 87⅛ the prices fell to 78⅛ to 79 cents on June 30th. In July, the market was dull, closing at 77½ to 78⅛, Hatch still plaguing the market and reducing the price of the farmers' product.

The market in August was weak, owing to strike troubles, cholera fright and generally unsettled features of business. Prices ranged from 74½ to 79⅝ cents, closing at 75 to 75½ cents. In September the market was depressed, and was a stranger to the slightest animation to vary the monotonous course, the market opening at 73 to 74½ cents, and closing at 72⅛ to 73⅝ cents. October brought improved conditions, and sales were made on the 10th at 74⅝. This small improvement did not last, and immense shipments of wheat came piling into the visible supply points in almost unheard of volume, and on the 29th the lowest price of the year was touched, viz: 69¼ cents.

November showed some cheering signs, though no material advance was attained. December was dull. There were some changes in prices, but so slight as hardly to justify comment. On the closing day of the year sales were made at from 71⅞ to 72 cents per bushel.

You may find on page 9 a useful table giving the highest and lowest prices of No. 2 wheat (cash) during each month from 1879 to 1892 inclusive. These tables will supply information which not infrequently is sought. Daily prices may also be found in their proper place in this volume.

The receipts of wheat for the year aggregated 50,234,556 bushels, against 42,931,258 bushels in 1891 and 14,248,770 bushels in 1890. Shipments for the year aggregated 43,833,795 bushels, against 38,990,169 bushels in 1891 and 11,975,276 bushels in 1890. The receipts for the crop year ending July 31st aggregated 43,429,070 bushels.

CORN.

The receipts of corn for 1892 aggregated 78,510,385 bushels, and shipments 66,104,220 bushels, against 72,770,304 and 66,578,300 bushels respectively, for 1891. On page 12 may be found a statement of the highest and lowest prices for No. 2 corn in Chicago during each month from 1873 to 1892, inclusive; also on pages from 62 to 85, inclusive, may be found the daily prices for the past year.

The remarkable feature of the market was the condition of the trade in the month of May, when under unusual influences prices rapidly advanced to $1.00 per bushel on the 31st of the month, and as rapidly fell to 48½ cents, plunging the house, which for a time controlled the market, into bankruptcy. At the opening of the month sales were made at 40⅝ cents. The market for the major portion of the year was an indifferent one. The lowest price was recorded in March, viz: 37 cents.

In April the demand increased and prices ranged between 38½ and 42¾. From the beginning of May more or less anxiety was developed, lest there should not be a sufficient supply of the con-

tract grade to provide for the sales made for May delivery. Seizing upon this situation the stock in Chicago was held with a firm grasp, which was forcibly relaxed, and the decline from an enforced extreme price was tumultuous and disastrous. This attempt to corner the market was a most pronounced failure.

A legitimate strengthening of values came in the month of June, when prices ranged from 45 to 56½ cents, closing that month at 50¼ to 51⅛. From this time the market was strong and steady until September, when prices eased off somewhat. A material reduction in prices occurred in October, when sales varied between 40½ and 44⅝ cents.

November brought a still lower market which was without animation. December was much of the same character, and sales on the 31st of that month were made at 40¼ cents per bushel. In this market as in wheat, the Hatch bill discouraged speculation, and the only animating influences existing were unfavorable weather reports and prospects of an increased foreign demand. This demand, we had reason to hope, would result from the efforts of the American Commission in commending the general use of American maize abroad as an article of food for man. Commissioner Murphy secured the adoption by the German army of a flour composed of equal parts of rye and corn meal. This was a great step forward in the prosecution of the work.

Liberal stocks of wheat on the continent left over from the old crop interfered with a more general demand for our corn from Europe. It is gratifying to observe that during the year several mills for the exclusive grinding of this great American product have been built in Germany, and we may properly indulge the hope that in the near future our exports of corn will largely increase. The national government should liberally sustain the plan successfully inaugurated of convincing the people of Europe of the cheapness and healthfulness of American corn, and that it is even a luxury, prepared as it is in this country for the tables of all classes of our population. We confidently believe that our exports of this article are destined to reach a large volume, thus, not only almost incalculably benefiting our great agricultural regions, but conferring a valuable boon upon the peoples of the old world, in giving them a highly nutritious food at economical prices.

The exports of this grain for the fiscal year was 75,451,849

bushels, valued at $41,590,460, against 30,768,213 bushels, valued at $17,652,687 in 1891.

The exports for the year ending December 31, 1892, aggregated 71,734,863 bushels, valued at $37,768,208, against 29,914,022 bushels, valued at $19,356,955 in 1891.

OATS.

The course of business in this grain during the year was without any unusual feature. A steady demand, both on local and shipping account, continued throughout the year. The quality was ordinary, and a large portion of the crop was light in weight, much of it weighing less than 32 pounds to the measured bushel. Large holdings from the crop of 1891 prevented any special advance in prices, and there were comparatively few inducements offered to speculators to enter the market.

The opening prices of the year were 30⅛ to 30⅜ cents, with a declining tendency. In the month of March, sales were made at 26¼ cents per bushel. As a rule, purchasers of long futures were disappointed. During the month of May sales ranged between 28⅛ and 33½ cents. The June market brought slightly better prices, but lacked animation. Quite a well sustained improvement came with the month of August, and 35¼ cents was reached. During the remainder of the year the market generally was quiet, and in favor of the buyer, the closing quotations being 30 cents per bushel.

The exports for the fiscal year were 9,425,078 bushels, and of oatmeal 20,908,190 pounds.

The following is a statement of the extreme prices each year for twenty-eight years, indicating the month in which such prices were realized:

RYE.

The receipts of rye in Chicago, for the past year, aggregated

3,633,308 bushels, and shipments 2,775,600 bushels, against 9,164,198 bushels, and 7,572,991 bushels, respectively, in 1891. The largest amount in store during the year was 579,203 bushels on the 23d of January.

The exports for the fiscal year aggregated 12,041,816 bushels, valued at $11,432,162.

The year opened with sales at 87 cents. The market during the month of January was a weak one, declining to 78 cents during the latter part of the month, showing but a slight recovery at its close. The prevailing conditions of this market were in striking contrast with those of the preceding year, when there was a large foreign demand for this grain, and a large quantity was sold short, both contributing to a very urgent inquiry, running up prices as high as $1.11½ per bushel. The continental European crops of rye were ample for home requirements, and the trade here had to look solely to the domestic demand for sustaining the market. There was hardly any animation to this market throughout the year, and interest in it seemed to almost disappear.

The decline was a steady one from the opening month, and in April prices declined to 70 cents per bushel. In May there was a slight recovery, but no activity. June a steady demand existed at about 75 cents. This ground was lost in July, and prices rapidly ran down to 66 cents. Even at this decline the market was not sustained and the August quotations ranged from 57 to 65 cents, the month closing lowest quotation. A still further decline occurred in September, with sales at about 56 cents per bushel. No material variation from this price occurred until the latter part of October, when 48 cents was touched, the year closing with sales made at 51 cents.

It was unfortunate for the profitable sale of this grain that there were such liberal supplies of low grade wheat constantly pressing upon the market at very cheap prices. Sellers, however, met the market conditions and the receipts were promptly disposed of, and no large amount carried in store.

While this grain is one of the most prominent cereals in Europe it is here considered one of the minor crops. The largest crop of rye produced by any country is grown in Russia, where the average crop exceeds 700,000,000 bushels. Germany produces the next largest crop of this grain, averaging 228,000,000 bushels. Germany imports about 30,000,000 bushels per annum, and Russia

exports about 46,000,000 bushels. Besides Europe, the United States and Japan are the only countries in which this is an important crop. Our average production is about 25,000,000 bushels, and net exportation about 2,000,000, leaving the supply for domestic requirements about 23,000,000 bushels, or a little more than ⅞ of a bushel for actual consumption for each unit of population. The average production of this crop in Japan is 22,000,000 bushels. The volume of the European crop aggregates 1,210,662,000 bushels. The crop of Canada is estimated at 2,000,000 bushels. The world's annual rye crop is estimated at 1,317,803,833 bushels.

BARLEY.

The receipts of barley for the year aggregated 16,989,278 bushels, and the shipments 10,438,281 bushels, against 12,228,480 bushels and 7,858,108 bushels, respectively, in 1891.

The exports of this grain for the fiscal year ending June 30th, 1892, aggregated but 2,800,075, valued at $1,751,445.

The United States Department of Agriculture has no recent estimates of the volume of this crop. For the past ten years it averaged about 57,000,000 bushels. It was undoubtedly considerably larger in 1892.

There is very little speculation in this grain, most of it being sold by sample on arrival. Most of the arrivals were below No. 2, which is the contract grade of barley, and is hardly quoted throughout the year. The daily quotations have reference to samples which vary in quality very materially. The crop was an inferior one both with regard to weight and color, and much of it was sold at extremely low prices, ranging from 28 to 30 cents per bushel. The best grades brought 68 to 72 cents per bushel. A steady demand continued throughout the year from maltsters, and there was a steady call from the east for the better grades. The export demand was not of sufficient volume to attract attention, or exert any influence whatever upon the market.

Barley is a prominent crop in Europe and Canada, and an important one in Japan. The largest crop of this grain is raised in Russia. The reported production of Europe is 565,000,000 bushels. This is the only cereal raised in this country which, in the past, was not produced in sufficient quantity for domestic requirements. The average net imports for the last ten years has

amounted to about 10,000,000 bushels. Canada has supplied this amount, but under the present custom law imports have fallen away to a small proportion and the surplus of this grain raised in Canada is seeking European consumers. This condition of things has stimulated domestic production, and at the present time the supply is equal to home requirements.

HAY.

The market for this article during the last year has been steady, with the exception, perhaps, of a few weeks in the early summer, when heavy rains made it impossible to press hay with safety. The crop of the country was uniformly good. This prevented large fluctuations in prices, and gave to the Chicago market an almost exclusively local character. This market has been an unusually extensive one this year, and a constant demand has prevented any accumulation of stocks. The daily requirements of Chicago and its suburbs aggregated about 750 tons.

There is more or less dissatisfaction with the method of selling hay, as it does not permit a thorough sampling. If the railroads would furnish the trade with hay warehouses similar to those, for instance, in the city of New York, the sale of hay in this market would be attended with less uncertainty than at present. It often happens that the original sale of carlots of hay has to be changed before final accounts are given to the consignor, as the unloading of the car shows that its contents were not of uniform quality. There would be less annoyance, both to the seller and the buyer, should these warehouses be constructed for the handling of hay consigned to this market. More hay is here received than in New York, and it is believed that the construction of these houses would be not only largely beneficial to the railroads centering here but to all hay dealers.

The receipts aggregated in the neighborhood of 235,000,000 tons. The yield per acre is estimated at 1.17 tons, which is about the same as 1891. The average farm price was $8.49, against $8.39 in 1891. The average value of business transacted during the year was $2,250,000. The highest price prevailed in June. Liberal shipments came from Nebraska and Indian Territory. No. 1 Timothy sold at from $7 to $16 per ton; No. 1 prairie, from $6 to $9; Illinois upland prairie, $5 to $13; Indiana, $4 to $11.50; Kansas, $5 to $14; Nebraska, $6 to $12; Dakota, $5 to $12; Min-

nesota, $6 to $9.25; Wisconsin, $7 to $10; Iowa, $5.50 to $15. Packed hay brought from $4.50 to $7.00.

A statement of prices by months may be seen in the appropriate place among the statistical tables of this report.

FLOUR.

The business in flour during the year was large, though but a small part of it was transacted upon the floor of the exchange. Very many sales are effected with the millers direct and shipments are made from the mills to purchasers, whose dealings are with the commission merchant in Chicago. These purchasers are located not only in this city, but in all domestic and foreign markets.

The statistical statements of receipts and shipments do not, therefore, exhibit the volume of the flour business here trasacted and controlled. It has no clearly defined channels through which it finds its way to the consumer. Flour is now offered for sale by nearly all classes of merchants carrying an assorted stock, and many sales are made in small and large lots by the mills without intermediate agencies, and a comparatively small quantity is manufactured in advance of an actual demand. The prices of wheat have been low, and have enabled the miller to secure good profits. There was a good demand from the winter wheat regions for the product of the mills in the northwest, which gave an unusual element of strength to the general market.

The market throughout the year was a declining one, the lowest prices being in December, when bakers' grades sold at the unprecedented low price of $1.75 per barrel. The price of bread, however, kept up upon the basis of $2.50 to $3.00 per barrel for flour. A full statement of prices may be found on page 7.

The exports for the year ended December 31st, 1892, aggregated 16,976,000 barrels, valued at $80,214,001, against 12,610,003 barrels and $62,771,641, respectively, in 1891.

The receipts at Chicago for the year aggregated 5,919,343 barrels, and shipments 5,710,620 barrels, against 4,516,617 and 4,048,129 barrels in 1891.

Extensive wheat speculation in Chicago, causing higher relative prices here for this grain than elsewhere prevail, renders this an unfavorable locality for the establishment of flour mills. Hence our output of flour was last year very small, and while our grain

business and receipts show an immense increase, there has been no material increase in our flour output for several years.

The flour production of the United States exceeds that of any other country, and our exports of wheat flour are larger than the net exports of all kinds of flour from all other countries. The United Kingdom is the great customer importing annually an average of 1,660,000,000 pounds of wheat flour, equivalent to about 38,000,000 bushels of grain. Next to the United States in the production of flour are Austria-Hungary and Germany.

SEEDS.

The trade in flaxseed was without the speculative features by which the trade for 1891 was distinguished, and prices were materially lower than those of that year. The experience of those who during 1891 bought and sold for speculative purposes was not of such a nature as to induce them to bestow any attention upon the market last year.

The cash and distributing business was of gratifying proportions. Prices were without any great fluctuations. Quite liberal supplies during the first part of the year prevented any special animation in the market. It is estimated that at the opening of navigation more than 4,000,000 bushels had accumulated in store. During the spring and summer, our market was strengthened by a good export demand. This, however, was stopped by a slight advance in prices caused by prospects of a short crop. Prices ranged throughout the year from 92½ cents to $1.13 per bushel. Receipts for the year aggregated 9,475,823 bushels and shipments 8,802,220 bushels, against 13,229,150 bushels, and 9,474,283 bushels, respectively, in 1891, and 7,296,000 bushels and 6,594,581 bushels, respectively, in 1890.

The receipts of all kinds of grass seed for the year aggregated 62,702,603 pounds, against 68,166,231 pounds in 1891, 72,086,100 pounds in 1890 and 84,599,331 pounds in 1889.

On page 91 of this report may be found a statement of the weekly prices for clover and timothy seed. A detailed statement of prices of flax seed may be found on pages 86 to 88, inclusive.

The receipts of timothy seed for the year aggregated 40,627,156 pounds, and shipments 36,568,384 pounds; the receipts of clover seed aggregated 5,772,423 pounds and shipments 9,396,227 pounds.

There were no characteristics in either markets to call for

special remark or explanation. There was hardly any speculative demand, and the large surplus of timothy seed carried over from the preceding year prevented any material advance in the early part of the year. Prime timothy seed sold from $1.08 to $2.08 per bushel, the higher price prevailing during the latter part of the year. This advance was to a large extent brought about by the eagerness of shorts to cover their contracts made early in the season. Under these conditions prices reached a higher point than had been attained for several years. The new crop did not move as early as is generally the case, and as a consequence the reserves were disposed of before the new crop arrived in large quantities.

Clover seed ranged in price from $4.00 to $7.90 per bushel, the higher price of this seed being also secured in the latter part of the year, and the general level of prices was higher than that of 1891. Quite a large volume exported in the early months of 1892 gave permanent strength to the market, and the character of the season did not at all favor an early crop. Crops abroad were but of moderate extent, and there was throughout the year more or less inquiry from European markets, for prime to choice clover seed. The year closed with reduced stocks both here and in the hands of country dealers.

CONCLUSION.

Never before has Chicago so throbbed with life or stood in such nearness to so animating a future, as at this period in her wonderful history. Her eloquent acquisitions in every department of industry and of learning, the fruit of her indomitable will, fired by an ambition which will not be appeased, stimulate her to newer and greater endeavors as she enters upon this eventful year.

Upon her spacious grounds spread along the southern shore of Lake Michigan the stupendous and marvelous signs of human progress will be gathered. All that man, guided and controlled by his finer sensibilities has attained, and all that man, under the mighty enginery of an unconquerable human purpose, has achieved, will be displayed in amazing variety in the world of industry and utility; all those expressions in art which have led man to admire the beautiful and the real, will captivate and instruct; all those conceptions of the divine in sound which, in the sublime creations of the great masters of music, have thrilled with exquisite

harmonies the ages, will be rendered. And by this great manifestation, man everywhere, all over the globe, will be again summoned to the exercise of his grand prerogatives in working out the destiny of his race. All these inspiring exhibitions of man's genius will awaken a more intense desire to excel along the diverging lines of universal development, and will signally promote activity in the interchange of commodities between states and countries.

Respectfully,

GEORGE F. STONE,

Secretary.

Chicago, January 10, 1893.

Your Board of Directors has during the year purchased and canceled $50,000 of the bonds of the board, leaving a total bonded indebtedness of $1,250,000, bearing interest at 5 per centum per annum, payable semi-annually, and due in 1933, at the option of the board after 1893.

The board has now paid $250,000 on its original bonded debt, reducing the annual interest premium expenditure $12,500.00, besides an annual insurance premium amounting to $2,220.00, making a total reduction of $14,750.00 resulting from the retirement of $250,000.00 of bonds.

It is the judgment of the Board of Directors that it is not advisable to purchase any more of the bonds of the board at the present time. In this view your board has made the per capita assessment for the year 1893, $45.00, a reduction of $20.00 per capita from the assessment of 1892. After the payment of all bills, and the purchase of $50,000.00 of bonds as hereinbefore described the board has on hand in cash $30,906.55.

Throughout the year the prosperity of the board has been menaced by the anti-option bill, and nothing less than the most strenuous efforts were demanded to prevent the passage of the pernicious legislation which this bill proposes. Accordingly at the commencement of the duties of your Board of Directors, a committee was appointed, with the President as chairman, charged with the duty of upholding that system of buying and selling for future delivery, which enables the agriculturalist to sell his grain

without undue depreciation of price and independently of a strictly consumptive demand. Thus far the efforts of your directors have been successful in thwarting the purposes of those who would revolutionize the business of the country, and bring disaster upon its commercial interests.

The board does not propose to relax its efforts to defeat the bill introduced in Congress by Messrs. Hatch and Washburn. Your directors would have been clearly culpable had they not employed every honorable agency and means at their command for the protection of the vital interests of the board, and of that great commercial system which upholds and prospers every industry in the land. In their defense of this great system, devised in the interest of the farmer, and in answer to the inevitable necessities of his surroundings, your directors not only protected the vital interests of this board, but in so doing have sustained that great system of commerce pervading all mercantile transactions to which the wonderful commercial development of the age is to a very great degree attributable.

Your Committee on Real Estate has addressed itself with special fidelity to its appropriate duties, and all the expenditure which it has authorized and recommended to the Board of Directors have been prompted in the interest of a wise and comprehensive economy. No extensive or unusual expenditure has been made in this department, particularly with reference to repairs and to the engineer's department, without thorough investigation by scientific experts.

The system of steam-heating has received the careful attention of your committee, and has been so improved and extended that a large part of the Board of Trade Building is heated according to the most perfect plan of modern steam heating. There are now in use only four boilers to drive twenty-seven steam cylinders and heat all the building, whereas before this system was brought to its present state of perfection it required six boilers to simply heat the building. It is proposed to extend this improved system of steam heating throughout the entire Board of Trade Building, and to extend its advantages to all our offices.

A considerable part of the expenditures in this department has been incurred in providing new belts in the dynamo room, as owing to the excessive heat in that department the life of a belt has been very much shortened.

Your committee has kept constantly in view the fact that it is not advisable to run any risks in connection with our boilers and elevator cables, and as our mud-drums have given us more than the average life, and as they began to show signs of weakness, your committee concluded that these should be renewed.

For obvious reasons the elevators in the building have received the constant and careful attention of your committee.

The marble work around the base of the columns in the exchange hall has been repaired and built upon strong steel frames in such a manner that it is independent of the main walls of the building.

From these general observations may be properly inferred that the expenditures in the Real Estate Department have been made as the result of a careful and thorough investigation.

It was not deemed advisable by your directors during the past year to carry out the plans which were entertained at the beginning of the year of converting the call room of the board into offices. At a future and convenient time it might be well to accomplish this result.

The expenditures in the Real Estate Department during the past year were as follows:

Interest on bonds	$65,143 75
Taxes	25,182 26
Insurance	9,628 50
Expenses of real estate department (including salaries of engineers, janitors, firemen, elevator men, etc.)	61,918 03

The difference between the aggregate of these amounts and that of the amount derived from rentals, which difference amounts to $42,044, may be considered as the cost to the Board of Trade for the use of the exchange hall and of all other rooms occupied by the association.

In accordance with the expressed and oft repeated preference of the association the telegraph companies have been re-instated upon the floor of the exchange hall, and reduced rates for telegraphic messages were restored, and a great saving of expense was thereby made to the members of the association in the conduct of their business. Not only did this result in the saving of a large amount of money to the members, but in increased rapidity and frequency of communication with their customers. Thus promoting to an incalculable extent their business interests and those of

their patrons. This change urged by the members of the association upon your directory has abundantly justified the wisdom of your action.

The present membership of the association is 1903, the number of transfers made during the year was 153, yielding a revenue of $3,825.00.

The receipts of grain and of flour in its grain equivalent aggregated 256,000,000 bushels, which are largely in excess of like receipts for any year in the history of the board, and are 102,000,000 bushels more than were received in 1880.

The shipments of meats in various forms during the year aggregated 2,063,000,000 pounds, pork 294,781 barrels, and of lard 399,000,000 pounds. The detailed statistical statements connected with the business of the board, directly and indirectly, may be found in the Secretary's annual report.

Neither the resources of the country, nor the enterprise of its merchants have been wanting to complete a year of unprecedented and general prosperity. Had not propositions of vicious legislation threatened to undermine the business of this board, the enormous and unprecedented volume of receipts would have insured a most profitable business throughout the year. Under such disadvantages we must congratulate ourselves upon the outcome of the year's business, the benefits of which, though not perhaps as generally diffused as in some former years, yet which again presents Chicago as the largest grain and provision market in the world, affording unequaled facilities for the rapid distribution of merchandise and for minimizing the risks of commercial transactions.

Your directors have indorsed the project of the construction by the government of the Nicaraguan Canal, having sent delegates to the Nicaraguan Canal Convention held in New Orleans, and having forwarded to Congress appropriate resolutions expressive of such indorsement, believing that the completion of this waterway would materially contribute to the growth of the commerce of the United States, and to that intercourse of mankind, which inspires emulation, excites and gratifies curiosity, brightens the faculties of the mind, softens the asperities of manners and awakens the sympathies of the heart.

The project of constructing a ship canal from Lake Erie to the seaboard has been urgently commended and was referred to the

National Board of Trade as the most effective and direct way of promoting the enterprise.

The Board of Directors commends the Board of Trade Congress to be held in Chicago under the auspices of the World's Fair Congress Auxiliary, in which the principal boards of trade of the world will participate, for the consideration of subjects vital to the interests of commerce throughout the world. Among the chief objects of that congress is the establishment of an international Board of Trade, which was introduced by a member of this board, and which received the unanimous indorsement of the National Board of Trade at its last meeting in Washington.

The Board is also represented in the Congress of Arbitration and Peace of the World's Fair Congress Auxiliary, and in its activities and deliberations has identified itself with the progressive mercantile spirit of the times.

Your Committee on Transportation has with marked ability attended to the responsible duties which have been assigned it. It has been of essential service to the members of the board, and especially to those who have been engaged in the business of receiving and shipping grain and provisions. It has on many occasions been called upon to intercede on behalf of the shipping public with the railroads, not only centering in Chicago, but with those whose termini are in the eastern and seaboard cities. At the time of an unusual volume in the receipts of merchandise its experienced and effective efforts have saved the members of the board large sums of money ; and it has by its intermediary offices contributed in no small degree to the large volume of business transacted by the receivers and shippers of this association.

In its activities and conferences with railway officials it has done very much to do away with the feeling of antagonism, which unfortunately has heretofore existed between representatives of railways and those of commerce. Its presentation of arguments and its labors have been based upon the fact that the interests of railways and those of merchants are identical. With this enlightened doctrine now so well established and rapidly gaining ground in the discussion of transportation questions, claims which are just and reasonable have been promptly and satisfactorily settled.

The labors of your committee have, as intimated, not been confined to local issues, but they have had reference in many instances to mercantile interests generally, and to varied industries

throughout the land. Your committee's labors have been along the line, therefore, of a broad public policy, with a view of establishing these amicable relations between railway management generally and the widespread business of the country.

To its industry and experience in co-operation with the Shippers' Association, may be rightfully attributed the efforts of the board in establishing beyond controversy the government control, as against corporations of every kind, of the Chicago river, and to thwart the efforts of private interests to subvert national privileges to individual gain.

Among other things that your Transportation Committee has accomplished was the prevention of switching charges being made to regular elevators in Chicago, which it was the concerted plan of the railroads to impose. It is believed that the prevention of the carrying out of this plan has saved the shipping and receiving interests of this city not less than $50,000 for the past year, and the benefits of such results are not for one year alone. In that view the benefits accruing not only to Chicago, but to the entire country, are beyond calculation.

This and similar reforms have been brought about by frequent intervention and consultation, thus avoiding the expense and delay of litigation, which in the past has been too frequently employed. It is only by consolidated and continuous effort that the varied problems which transportation presents can be satisfactorily solved. This is the basis upon which the National Transportation Association was organized, and its good results are already manifest in the readiness with which transportation representatives listen to and settle the claims of merchants.

The Chicago Freight Bureau, through which in many instances, the Transportation Committee has brought about its results may be regarded as the right arm of that committee. The facilities of the office, and the influence which is derived from the fact that it represents not only the merchants of this board, but those of all branches of business in Chicago, have contributed to the satisfactory results of the labors of your committee.

We are pleased to observe that the members of the board have adopted the recommendation of your Board of Directors in its last report, to avail themselves of the facilities of the Freight Bureau, whose office is conveniently located in the Board of Trade Building. These facilities should be more fully and constantly

employed by members of this board in the collection of claims against railways, and in the correction of any abuse which may arise in connection with the prosecution of the enormous business transacted by members of this mercantile body.

A detailed and full report will be made by the bureau for general distribution. It is perhaps sufficient in this report to state that the number of claims filed in the bureau amounted to 596, and the amount of said claims $11,467.30. Of these claims $8,126.33 were adjusted and paid, and there is reasonable hope that $2,677.07 may yet be collected. Doubtful claims amount to $663.90. Claims representing $1,257.23 were filed in the month of December, and are still being pressed and are under consideration.

The history of claims against railroads, especially during the past year, has demonstrated the wisdom of establishing freight bureaus in all the principal cities of the Union. In matters that effect the general commercial welfare the combined efforts of these organizations, presided over by men familiar with the details of railroad business, have been of immense advantage to the business interests of the country. Every year the combined interests of these important agencies are becoming more and more effective in the direction of collecting claims against transportation lines, in adjusting rates upon an equitable basis, and of correcting inequalities, which, without these agencies, would be continued indefinitely.

Your Membership Committee has had its regular sessions for the consideration of all applicants for membership in this board. It has carefully attended to the responsible duties with which it is charged, and has guarded the board from admitting those applicants to membership who were unworthy of credit or in any way unworthy to enjoy the privileges of this association. We believe the duties which devolve upon this committee are among the most important duties with which any committee of this association is charged.

Your Committee on Market Reports has during the past year been relieved from the responsibility and important duties which in past years have devolved upon this committee.

The Meteorological Observation Committee has attended to its duties, and has maintained the efficiency of service in this department. During the year the meteorological board has been repaired

and a new map drawn upon it, so that the various weather reports, such as temperature, rainfall, direction of winds, and all meteorological changes which directly affect the crops of the country can be displayed.

Your Committee on Legal Advice has been unremitting in the discharge of its responsible duties, and its chief aim has been to avoid all unnecessary litigation and expense. Questions which have arisen in the directory in connection with the trial of cases and the administration of the interests of the board, which had in them any legal features, were referred to this committee, so that in the future the doings of the board with respect to any changes in its rules will not be liable to involve the board in legal complications and expense.

Your Committee on Rules has had frequent sessions in the consideration of the subjects which naturally were referred to the painstaking care of that committee.

Your Finance Committee has regularly convened for the inspection of the bills against the board, and has regularly presented for concurrence by the directory its monthly statement, verified by an expert accountant. This committee has exercised due diligence in the discharge of its duties, not suffering the efficiency of the board to be impaired in any manner by a short-sighted policy.

Your Committee on Rooms has had frequent occasion to discharge its responsible duties, and its labors have involved a large part of the time and thought of the members of this important committee.

Your Committee on Clearing House has watched with constant care the business connected with the clearing house, and has so attended to its duties that the intricate machinery of this part of the board's interest has gone on without friction or embarrassment, yielding to the board a profit of $3,739.87.

The duties of your Warehouse Committee and also of the Provision Inspection Committee have been very much increased since the action of the board compelling a yearly inspection of grain and provision warehouses. The inspection of these warehouses has been personally attended to, and the reliability of grain and provision receipts issued by warehouses declared regular under the rules is unquestioned.

The time and attention of your Committee on Weighing has

been frequently taxed in the interest of the members of the board.

The various inspection committees have faithfully attended to their respective duties, as is shown by the fact that no serious controversies or differences have arisen with reference to the inspection, either of provisions, flour, flaxseed, or of any other articles dealt in by the members of this association.

The number of deaths during the year were twenty, among which is recorded the death of Hiram Wheeler, an ex-president of this board, and one who by his sagacity, integrity and ability has contributed largely to the good name and dignity of this association.

In conclusion, your Directors congratulate the members of this association upon the position which this Board of Trade occupies, not only with reference to the commerce of this country, but in its relations to foreign commerce.

The primary function of boards of trade is to bring the consumer and producer together, the buyer and the seller, so that each may be unhindered in the pursuit of his industries, and may market and purchase his goods at the smallest expense both of money and of time. Boards of trade have no private interest to promote. Their welfare depends upon the value of the services which they render to the commercial public in the interests of fairness and justice, and in providing, without expense to either, the information from all parts of the world which is essential to the profitable conduct of business.

The commercial exchange stands, therefore, for equity and fair dealing, and employs its facilities for the benefit of the buyer and seller, and for the unhindered distribution of products and the economical exchange of surplus commodities. This is the attitude, and the only attitude which the commercial exchanges of the nineteenth century occupy. It is a nineteenth century idea of commerce that no advantage shall be enjoyed by either the buyer or the seller, and that no man or section shall be permitted to take any advantage whatsoever with reference to all facts concerning supply and demand.

It is the province of boards of trade to spread upon the bulletins of the world for the information of all, the facts derived from the great marts of trade, from great manufacturing industries and sections, concerning the movement of merchandise, rates of transportation, and all facts which enter into the commercial life

of men. Without these facilities which boards of trade or commercial exchanges create, the commercial development of today would not have been possible, and notwithstanding in this great system of commerce there are some defects, these institutions have contributed in manifold ways, most materially to those results which make memorable the achievements of the nineteenth century.

As long as the present conditions of trade and commerce, both foreign and domestic, prevail; as long as men strive for supremacy in the markets of the world; as long as ships laden with merchandise sail the seas; as long as cars freighted with commodities fly across the continent; as long as products are exchanged and men mingle together; as long as ambition rules and stimulates the mind of man, so long will boards of trade continue to exist, harmoniously and economically presiding over and directing the manifold and magnificent forces of mercantile life.

Respectfully submitted,

By order of, and adopted by, the Board of Directors,

CHARLES D. HAMILL,

President.

ADDRESS OF CHARLES D. HAMILL, PRESIDENT.

When men are in fact, as well as in theory, equal, the will of the majority is the highest wisdom. A vote of confidence, therefore, cannot but be grateful to one who has striven in the interest of the voters. Construing my re-election as a vote of confidence, I take my place for a second term, relying upon your co-operation, and hoping for a prosperous year. I thank you most cordially for the honor you have conferred upon me.

Probably at no time in the history of this Exchange has it more fully than in the past year served the purposes of its organization, in securing to the producer and consumer, buyer and seller, merchant, farmer and banker, the best advantages of a permanent, certain and constant public market. And yet at no time has there been so much unfair and ill-advised criticism of this and kindred associations. Such criticism, at one time limited to the unsuccessful and the wholly uninformed, has become the thunder of the politician and the lightning of the legislator. Gentlemen of supposedly deep knowledge of economics and wide experience in public affairs, are found advocates of governmental suppression of our trade.

At a time when the body of the people, and certainly the farming community, has expressed its dissent to a policy of trade restrictions, evidenced in one form, there are found political charlatans and economic quacks leagued with others more honest and more ignorant than themselves, distrusting the power of the individual to best care for himself, for the object of imposing in another form the already popularly rejected policy.

The function of the distributor is as essential to the social organism as is that of the producer. Nor is it to be overlooked that the producer is himself a distributor, the first link in the chain of communication between himself and the consumer, and that any interference with the distributor necessarily is an interference with the producer. The early farmers of the west found their own markets, as best they could, but now the middleman

finds both the immediate and the ultimate market for our products.

Boards of trade are the agencies used by this middleman, and they are as necessary an outgrowth of the requirements of the times, and as certain proof of commercial development as are banks in the sphere of finance, or railways in the business of transportation. Upon the floors of these exchanges the producer and consumer find the common market of each, no matter how remote the fields of the one or the mills of the other. On these exchanges the business of each finds system and definite and certain regulation. However distant either may be, he knows in advance exactly upon what terms, and with what promptness and certainty the business intrusted will be carried out.

It may be safely averred that in no other trade or industry is so large a volume of business conducted at so small relative expense. Buyer and seller have brought to their knowledge daily every item of information relating to, or affecting, market values, present or prospective.

In what other way, it may be asked, than through the agencies supplied by these great public markets can be cared for the enormous supplies which the producer constantly sells, and forces through necessity, upon the market in advance of consumers' demands?

If the grain growers of this country had no other immediate purchaser than the daily consumer, and pressed their supplies upon his tardy and reluctant demands, where would prices go? In the present state of the visible supply of wheat alone, over eighty-one millions of bushels have been marketed in advance of consumers' wants. It is unnecessary to inquire why the producer has desired to sell this immense quantity of wheat in advance of consumptive demand. It is sufficient to know that he has done so, and found a market for it in buyers, who were manifestly not consumers, but capitalists, investors and middlemen, who, through the agency of these exchanges, were enabled to pay for, and carry, these millions of grain, and to the extent this is done, boards of trade create and maintain a market. It is impossible to conceive of any method whereby this grain could have been thus quietly marketed, except through the facilities which boards of trade afford.

The system of grading and inspection conducted under state laws is an aid, but not a market; the immense warehouses, where the grain is stored and receipted for, are, of course, a necessary incident, but still they are no part of the market; capitalists and

banks, that stand ready to advance money to carry these vast supplies, are still another and necessary part of the business, but certainly they are not the market. The market that brought into existence some of these aids and utilizes all of them, is composed of the dealers who meet on the floor of the exchange, and in the sharpest competition known in any trade, buy and sell, and provide for this great volume of grain, until it moves to the domestic mill, or is taken by the foreign buyer.

It is unnecessary to state that all restrictions upon the transactions carried on by boards of trade must surely react upon the producer, whose market, by the means alluded to, is brought almost to his very door, and is always available. Can prices be advanced by increasing the hazard of the investment? Will capital be employed where the risks are disproportionate to the gain?

There is no magic in a statute to create a market or to coerce capital into a business which it can not freely conduct. If it be proposed to impose all the risks upon investors, while depriving them of a large and certain field of operation, it cannot be doubted they will stand aloof, and every grain producer, in default of an open and continuous market, will be created a speculator.

Boards of trade are the natural and inevitable outgrowth of our commercial life. They are a part of that great system of the subdivision of labor, which bespeaks our social and material progress. The necessities of trade and commerce produced them, and no more is required in defense of their existence than is required in defense of insurance, the wholesale merchant or the banker.

During the past year equal to 256,000,000 bushels of grain were received and disposed of on the floor of our own exchange. Not a bushel of it was sent by the producer without accurate knowledge of the price prevailing in this market at the time of its shipment. He knew that he had the security of impartial and intelligent inspection of its grade, that it would be stored in a public warehouse at a known and unchangeable charge, and that there was a market here where at any moment of the business day there could be found a buyer. Yet we are told that our public exchanges are a detriment to the farmer; that the men and the trade conditions that created and maintain them are all wrong, and need regulation; that the market is too broad, and prices are

depressed by the facilities afforded for business, and, most wonderful of all, that congressional action is the proper remedy.

The policy of this exchange, in its relations to the public and commercial affairs, has been liberal, and in keeping with its standing as the chief grain market of the world; and its attitude on every question relating to the largest commercial freedom calls for general approval. Certainly we cannot well afford, while objecting to the restrictions proposed by others, to assume any position which tends to embarrass or hinder the freedom of trade in all commodities dealt in by us.

Our opposition to the legislation now pending before Congress rests largely on the doctrine that on the average every man is the best custodian of himself and his own affairs; if left to grow without impertinent interference from government or busy-bodies the utmost advance is to be expected of him; that, this being true of the individual, it must also be true of society as a whole—a composite of individuals. To whatever qualifications in other matters of public concern this doctrine may be subject, as applied to commerce no exceptions occur to me.

I must, therefore, and do, regard as the proper policy of this Board of Trade, and one it will be my endeavor to carry out, a policy of liberality, reliance on the individual, and so far as possible, perfect freedom from restraint in all matters of trade.

"Plugged," "Loaded," or "Scoured" grain.

"The said Chief Inspector, and all persons inspecting grain under his direction, shall in no case make the grade of the grain above that of the poorest quality found in any lot of grain inspected, when it has evidently been "plugged," or otherwise improperly "loaded," for the purpose of deception. Wheat which has been subjected to "scouring," or to some process equivalent thereto, shall not be graded higher than No. 3."

Attempts at fraud, or interference.

"All persons employed in the inspection of grain shall promptly report to the Chief Inspector, in writing, all attempts to defraud the system of grain inspection established by law, and all instances where warehousemen shall deliver, or attempt to deliver, grain of a lower grade than that called for by the warehouse receipt."

"They shall also, in the same manner, report all attempts of receivers or shippers of grain, or any other person interested therein, to instruct, or in any improper way to influence the action or opinion of any inspector in the discharge of his duty; and the Chief Inspector shall report all such cases to the Commission."

*Slaughtered at Hammond, Ind. † No returns for 1891-2. ‡ Estimated.

There has always been some doubt as to the number of cattle packed at Chicago—in most cases the number reported exceeding the net receipts. But it must be understood that the returns of the slaughterers include calves, of which they kill about 100,000 annually. It must also be understood that the slaughtering at Hammond, Ind., includes cattle which may be received by railroad from other sections, and which do not pass through the yards at Chicago, and also that some cattle received at Chicago, consigned direct to packers, may not be included in the arrivals.

* During 1887-9 the Minnesota office was located at St. Vincent; since that date at St. Paul.

Reference to above table will show that while Chicago ranked fourth on comparative economy of expenditures for collecting the revenue at the close of 1887-8, she ranked third in 1888-9 and 1889-90, was tied for second place with Philadelphia in 1890-1, and in 1891-2 was tied with New York for first place. The collections and expense of making same so far for the present fiscal year indicate that the receipts will aggregate from $7,500,000.00 to $8,000,000.00, while the cost to collect will be reduced to less than .019 on the dollar.

It will also be observed Chicago is the only port in the list to show a steady increase in collections during the half-decade covered by this statement.

NOTE.—Prior to the year 1820 no official records of the arrival of alien passengers were kept. It is estimated, however, that the total number arriving in the United States from the foundation of the government to the year 1820 was 250,000.

Up to the year 1856 no record was kept of immigrants in distinction from the arrival of alien passengers.

Of the number of immigrants arrived during the year ending June 30th, 1892, 50,527 came from England and Wales, 55,467 from Ireland, 11,520 from Scotland, 130,758 from Germany, 591,160 from Italy, 79,294 from Russia (except Poland), 43,247 from Sweden, 14,462 from Norway, 2,728 from China and 80,126 from Austria-Hungary.

The total number of European emigrants for the last fiscal year was 608,472.

Of the total number of immigrants for the year 385,781 were males and 237,303 were females.

The year ending June 30th, 1882, was the year of the greatest immigration.

Owing to the absence of law for the collection of statistics in relation to immigrants by railroads, those from the British North American possessions and from Mexico are not included since July 1, 1885.

The law under which immigration statistics are collected was passed in 1821, when our foreign commerce in merchandise amounted to only $109,000,000, and before the first railway was constructed. At that period there was no intercourse or interchange of commodities by land with border people save only by an occasional adventurer.

NOTE.—Up to 1850 only the aggregate valuations in the several counties were reported to the State officers, and from 1852 to 1857, inclusive, a few counties returned only the aggregates; hence the details of real estate and personal property valuations are not complete for those years. In 1867 and 1868 the details of valuation are not entirely correct, owing to changes by the operation of the equalization law. Since 1868 the valuations are as equalized. The total valuations in each of the several years are correct and official.

The valuations for 1873 as equalized are largely in excess of any previous year. In 1874 some changes were made in the manner of equalizing the assessments, resulting in reducing all the valuations, especially those of railroad property.

The State debt, as noted, represents it as it stood on the 1st of January in each of the several years to 1869; in 1869 and 1870, as it stood December 1; in 1871, as it stood December 31; from 1872 to 1879, as it stood December1.

NOTE.—From 1851 to 1862, inclusive, a lamp tax of half a mill to two mills was levied on certain portions of the city, and is included in the above total tax. The city debt as noted represents it as it stood on February 10 in 1852 to 1854, inclusive; on February 1 in 1855 to 1861, inclusive; on April 1 in 1862 to 1874, inclusive; and on Dec. 31, since 1874. Valuations for 1875 to 1883, inclusive, are by the county assessment, as equalized by the State Board of Equalization, and in some of these years do not include railroad property. The city tax on railroad property for 1882 and 1883, something over $100,000 for each year, is not included in the above total tax. The above figures for 1889 include the districts annexed to the city of Chicago July 15 of that year.

NOTE.—In the above table the estimated yield per acre was, up to 1884, that of the best authorities, helped by a calculation of the results in each season; in the following years the Government figures have been adopted. In estimating the rate of consumption the conventional rate of 5½ bushels per capita is taken up to 1880-81, since when the rate of 5 6 bushels per capita has been assumed, such being considered nearer the actual consumption

From official returns; the chetwert being converted into bushels; 1 chetwert—5.77 bushels wheat, 7.04 bushels barley, 9.84 bushels oats, and 6.4 bushels rye.

Failure to deposit. Contracts may be closed.

SEC. 5. Should any party called upon, as herein provided for, fail to deposit the security called, within the next banking hour thereafter, the party making such call shall have the right, if he be

the seller, to resell the property for account of the delinquent, such resale to be for the same delivery as was named in the original contract; if he be the buyer he shall have the right to repurchase the property for account of the delinquent, deliverable at the time named in the original purchase; in either case he shall at once communicate to the delinquent the action he has elected to take, and all losses or damages on such defaulted contract shall be at once due and payable, the same as though said contract had fully matured. The party so calling may, however, elect to permit the contract to stand, in which case no notice to that effect shall be necessary to the delinquent. All notices for the call of deposits as security, or of the closing of contracts under this Rule, may be served on the party called, either in person or by leaving a written notice at his place of business, or may be served in person upon his authorized representative, or upon any clerk representing the party on 'Change; and in case the party called upon shall not be known to have a regular place of business, a written notice left in the office of the Secretary of the Board shall be deemed sufficient.

Notices of call or of the closing of contracts.

SEC. 6. Upon the fulfillment or settlement of any contract, or upon the closing of any contract under the provisions of Section 5 of this Rule, deposits upon which have been made, and when the full adjustment of all differences relating to the same shall have been effected, the deposits shall thereupon be payable to the party depositing the same; and the joint indorsement of both parties upon the certificate shall be a sufficient authority to the party holding the deposit to pay the same to the holder of the certificate; or in case of a failure between the contracting parties to adjust and settle their respective claims upon the deposit within three (3) business days after the maturity of all contracts upon which the deposit is applicable, the matter in dispute shall, upon the application of either party to such contracts, be submitted to a select committee of three disinterested persons, members of the Association, to be appointed by the President, which committee shall, without unnecessary delay, summon the parties before them, and hear such evidence under oath as either may wish to submit touching their claims to the deposit, and shall by a majority vote decide, and report to the President of the Board, in writing, in what manner and to whom the deposit is payable, either wholly or in part; whereupon the President shall indorse on either the original or duplicate certificate an order for the payment of such deposits in accordance with the decision of said committee, and such order shall be a sufficient warrant to the party holding the deposit to pay the same in accordance with such order. In case any member neglects or refuses to indorse a certificate of deposit to the party entitled to receive the money thereupon when all contracts upon which the deposit is applicable are settled, and all money due upon such contracts has been paid, he shall be liable to a penalty of one per cent. per day on the amount of such certificates, for every day such refusal or neglect is continued; and for refusal to promptly pay such penalty, the party may, upon due complaint, be suspended from all privileges of the Board until the same is paid.

In case it should occur that by reason of changes in the market, or of delivery upon, or the settlement of a portion of the contracts upon which security has been deposited and to which such security is properly applicable under this Rule, that a larger sum remains on deposit than is contemplated by Section 1 of this Rule upon then existing unadjusted contracts between the parties, and either party to such contract should refuse to release such excess of deposit, the President of the Board is authorized, upon a representation of the facts and admission or proof that such excess ought to be released, to order such release and payment to be made to the party to whom it rightfully belongs, by the indorsement of an order to that effect on either the original or duplicate certificate or certificates issued for such deposits; *provided*, in case of such disagreement no surrender of the deposit shall be ordered pending any arbitration touching the rights of the parties under the said contract or contracts, or in case the party refusing to adjust the dispute shall signify his willingness to submit the matter to arbitration.

Value of property under this Rule, how and by whom determined.

SEC. 7. In determining the value of property under this Rule, its value in other markets, or for manufacturing or consumptive purposes in this market, together with such other facts as may justly enter in the determination of its value, shall be considered irrespective of any fictitious price it may at the time be selling for in this market. Such value, for the purposes of this Rule, in case of disagreement, shall be determined by the Board of Directors, and communicated to the parties in interest through the President or Secretary.

RULE XXI.

REGULAR DELIVERIES.

Tender of warehouse receipts.

SECTION 1. All deliveries upon contracts for grain or flax seed, unless otherwise expressly provided, shall be made by tender of regular warehouse receipts, which receipts shall have been registered by an officer duly appointed for that purpose. All such warehouse receipts shall be made to run five days from date of delivery on regular or customary storage charges, which regular or customary charges shall follow such warehouse receipts and be chargeable upon the property covered by the same, and shall be issued by such houses as have complied with the Rules of the Board of Trade and the Regulations and Requirements of the Board of Directors, and have been declared regular warehouses for the storage of grain or flax seed by said Board of Directors; and it shall be the duty of the Board of Directors, prior to the first day of July in each year, to inspect all warehouses the proprietors or managers of which shall apply to have their receipts declared regular for delivery on contracts under the Rules of the Board of Trade, and no warehouse shall be declared a regular warehouse unless it is conveniently approachable by vessels of ordinary draft and has customary shipping facilities, and unless the proprietors or managers of such warehouse are in good financial standing and credit, and are carrying on and intend to continue to carry on the legitimate business of public warehousemen under the

Requirements of regular warehouse receipts.

laws of the State of Illinois and in accordance with the Rules of the Board of Trade of the City of Chicago and the Regulations and Requirements of the Board of Directors; nor until the proprietors or managers of such warehouse shall file a bond with sufficient sureties in such sum and subject to such conditions as may be deemed necessary by the Board of Directors, under the Rules of the Board of Trade and the Regulations and Requirements of the Board of Directors in reference to warehouses.

Term for which made regular.

Warehouse receipts for warehouses so declared regular by the Board of Directors shall be regular for delivery on contracts under the Rules of the Board of Trade so long as the said warehouse shall continue to be a regular warehouse, but the term for which any warehouse is declared a regular warehouse to issue such receipts shall be limited to and expire on the first day of July in each year. No receipts issued on grain received in any warehouse shall be regular for delivery under the Rules of the Board of Trade after that date unless the warehouse upon which it has been issued has again been declared a regular warehouse by the Board of Directors; *provided*, however, that receipts issued before the first day of July by warehouses which have been regular warehouses during the preceding year, but which have not been declared regular for the succeeding year, shall be regular for delivery upon such contracts for sixty days after the first day of July; but nothing contained herein shall prevent the Board of Directors from declaring any warehouse, or the receipts thereof, irregular at any time for violation or non-compliance with the laws of the State of Illinois or any of the Rules of the Board of Trade or of the Regulations and Requirements of the Board of Directors.

Other storage room may be provided in case of necessity.

Provided, that the Board of Directors shall have power, when in their judgment an emergency exists requiring more storage room than can be supplied by the regular elevator warehouses, to declare any storehouses, vessels, or places suitable for the storage of grain or flax seed within the city limits—wherein the cost of delivery to vessels or railroad cars shall not be greater than such as is made by the regular elevators for the same service—to be regular places for the storage of grain deliverable under the Rules of the Board of Trade.

Deliveries on time contracts.

SEC. 2. All deliveries of grain and flax seed in 1,000 and 5,000 bushel lots; of mess pork, lard, or s. p. hams in 50 and 250 package lots; or of meats in lots of 25,000 and 50,000 pounds in store, on time contracts, after 11 o'clock A. M., shall be made in the Exchange hall, or in such other place as may be designated by the Board of Directors, between the hours of 1:30 and 2 o'clock P. M., and shall be made by a notice in writing, which notice shall state on its face the place of business of its issuer. Such notice shall state in detail the warehouse receipts proposed to be delivered, and in the case of provisions in packages, or lard, the packer's brand, and the contract price on which delivery is proposed to be made, also the net cash value (deducting extra storage) of said property at the market price. At a stated hour each day it shall be the duty of the Secretary to post or

cause to be posted, in a suitable place, the market price of such grain or provisions as are deliverable on time contracts. Such delivery notice may be passed from one purchaser to another, before 2 o'clock P. M., by indorsement thereon, by the seller, of the name of the party to whom it is to be delivered, together with the contract price at which the property is sold, and also the time at which the delivery is made. The first delivery of such notice shall be made before 1:35 o'clock P. M., and any party holding such notice longer than five minutes, as shown by the indorsements on same of the time of the previous delivery, shall not be permitted to deliver it. All delivery notices issued under this Rule shall be consecutively numbered by the parties issuing them. Notice of readiness to deliver property as herein provided, and all subsequent transfers of such notices, shall be deemed and held to be a valid and sufficient tender of property, on time contracts, under the Rules of this Board of Trade, provided the property is actually delivered, or is shown to have been ready for delivery, in the manner and upon the terms herein provided. It shall be the duty of the party regularly holding such notice at 2 o'clock P. M., to present the same at the office of its issuer before 2:30 o'clock P. M., of the same day, together with a certified check on some Chicago bank, in good standing, or other satisfactory payment for the net amount due for the property represented by said notice at the market price; and upon tendering said notice, with payment, at the office of its issuer, the holder of said notice shall be entitled to receive the property represented by same. All differences due from or to parties to such delivery shall be paid upon the basis of a full delivery, and no more, and each purchaser receiving notice of delivery shall be responsible to the seller from whom the notice was received for the difference between the price actually paid for the property and their contract price. In cases where the seller's contract price is less than the price actually paid for the property, such seller shall be responsible to the purchaser to whom he delivered the notice, for the difference. All such differences shall be due and payable immediately upon the delivery and payment for the actual property; it being the duty of each person transferring the delivery notice to ascertain what price was actually paid for the property.

Before 11 o'clock in the Exchange Hall by written notice.

On the first business day of each month all deliveries on time contracts of the kinds of property mentioned in this section, if delivered before 11 o'clock A. M., shall be delivered in the Exchange hall, or such other place as may be designated by the Board of Directors, between the hours of 8:30 and 9:15 o'clock A. M., in the same manner and under the same regulations, except as hereinafter provided, as is specified for similar deliveries after 11 o'clock. The delivery notice shall be of the same form and character in all respects as that prescribed for deliveries between 1:30 and 2 o'clock, except that it shall state the net value (deducting extra storage) of the property at the closing market price on the last business day of the previous month, for the delivery on which the property is tendered, which price shall be posted on the bulletin board of the settlement room immediately after the close of the market. The first delivery of the notice shall

not be later than 8:35 o'clock, and it shall be the duty of the party regularly holding such notice at 9:15 o'clock to present the same at the office of its issuer before 11:00 o'clock A. M. of the same day, together with a certified check on some Chicago bank, in good standing, or other satisfactory payment, for the net amount due for the property represented by said notice, as hereinbefore provided, and upon tendering said notice with payment at the office of the issuer, the holder of such notice shall be entitled to receive the property represented by the same. Property to be paid for, and how.

All differences between the price paid for the property and any contract prices involved in its delivery, due to or from parties to such delivery, shall be adjusted and paid in the same manner and with the same liabilities as in the case of delivery made under this section between 1:30 and 2 o'clock P. M. In case property represented by either of the delivery notices mentioned in this section is not called and paid for as herein provided, it may be held by the issuer of the notice, for and at the expense for storage, interest, insurance, or other risk of the party whom it may concern, until 12 o'clock M. of the next business day, at which time it shall be sold in open market for account of whom it may concern; or it may be sold, if the notice was delivered before 9:15 o'clock A. M., at any time between 12:30 o'clock P. M. of that day and 12 o'clock M. of the next business day. If the notice was delivered between 1:30 and 2 o'clock P. M., it may be sold at any time between the beginning of trading hours and 12 o'clock M. of the next business day. The party holding the property shall, however, notify the party to whom he delivered the original delivery notice, before 2 o'clock of the same day, of the default, if the delivery notice was delivered before 9:15 o'clock A. M., or before 4 o'clock P. M., if the delivery notice was delivered between 1:30 o'clock and 2 o'clock P. M.—such notice of default to be in writing; and each purchaser receiving said notice of default shall in turn deliver the same, without delay, to the party to whom he passed the original notice of proposed delivery. All expense and risk of carrying property defaulted on, including a commission of one-quarter of one cent per bushel on grain, and one-quarter of one per cent. on the market value of provisions, shall be payable to the party required to make resale, by the party to whom he had the property sold, he to be reimbursed by the one to whom he delivered the notice of delivery, and so on until it is finally paid by the party in default. And in case of such default and resale of property, all differences shall be adjusted, as hereinbefore provided, on the basis of the price at which the property shall have been resold. All parties having property due them on time sales shall be present, or shall be represented by an authorized employe, in the Exchange hall, or such other place as may be designated by the Board of Directors, between the hours of 1:30 and 2 o'clock P. M. of each business day, and on the first business day of each month between the hours of 8:30 and 9:15 o'clock A. M.; and admission to the Exchange hall, or such other place as may be designated by the Board of Directors, shall be denied all parties after 1:30 or 8:30 o'clock, as the case may be.

In case it should appear on complaint duly made to the Board of Directors that any member has been guilty of issuing a notice of readiness to deliver property as herein provided, who had not the property mentioned in such notice in his control or possession at the time of issuing such notice, or, having issued such notice, shall thereafter dispose of the property, except as herein provided, or who refuses to deliver up such property when demanded, as provided for under this Rule, such party shall be deemed guilty of gross fraud, and may be suspended or expelled from membership in the Association, under the provisions of Rule IV.

The Inspector shall brand all flour, inspected by him in barrels, that is sound and full weight; stencils shall be used for branding, which shall read as follows: "Official Inspection, Board of Trade, Chicago," also giving month and year of inspection.

REGULATION V.

CERTIFCATE OF INSPECTION.

Certificates.

Irregular Flour.

Certificate of inspection shall be issued by the Inspector in strict accordance with the inspection of every lot examined by him. No separate certificate shall be issued by the Inspector for two or more

parts of any one lot of flour inspected by him, a part of which is sound and a part unsound, or when it inspects two or more grades. When flour is inspected by sample, the certificate shall mention its condition, as well as its relation to the sample. When flour is unsound the Inspector shall state in the certificate the character of the unsoundness, as *musty*, *hard sour*, *soft sour*, *unsound*, or *slightly unsound*, and the number of packages of each description, and also, when practicable, the number of packages that may be so stained or out of condition as to depreciate the market value of the flour. In case the flour has been overhauled and cleaned on account of having been wet, and the Inspector shall deem such overhauling in any way damaging to the market value of the flour, he shall note in his certificate "wet and cleaned." Flour in round-hoop barrels and jute sacks shall, in absence of any special agreement, be considered as regular in deliveries. If flour is in flat-hooped barrels, or cotton sacks, the Inspector shall so note in his certificate, also on sample furnished to the party ordering the inspection.

Unsound Flour—condition to be stated.

Damaged packages.

Round hoops and jute sacks.

REGULATION VI.

RE-INSPECTION.

There shall be no charge for a single inspection on flour belonging to the same owner for whom the first inspection was made; but on more than one inspection of the same flour, and on flour which has changed ownership after the first inspection, the Inspector shall be entitled to his regular fee.

Reinspection and charges for same.

REGULATION VII.

WEIGHTS.

A barrel of flour shall be deemed to weigh 196 pounds, net; jute and cotton export sacks, 140 pounds, gross; half-barrel jute and cotton sacks, 98 pounds, gross; quarter-barrel cotton sacks, 49 pounds, gross; eighth-barrel cotton sacks, 24½ pounds, gross, and no allowance shall be made for any overweight. In case of short weights on flour in barrels, the buyer shall be allowed for the shortage at the rate he pays, and, in addition, 5 cents per barrel for the expense of refilling. The Inspector shall satisfy himself in regard to weights, and in case he deems it necessary to strip some of the flour, he shall strip five barrels from each lot, and shall be entitled to 15 cents for each barrel so stripped; if it proves to be short in weight, the charge for stripping to be paid by the seller. All packages of flour which may be found largely deficient in weight, from bad order or any other cause, shall not enter into the average, but their weight shall be separately ascertained and certified to by the Inspector. When flour is sold in sacks, the gross weight shall be considered the actual weight. In case of short weight, the buyer shall be entitled to 1 cent per pound for freight. When flour in sacks is short in weight more than 2 per cent. it shall not be considered regular.

REGULATION VIII.

INSPECTOR'S FEES.

The fee for inspecting and branding flour within the City of Chicago shall be at the rate of 2 cents per barrel, whether the flour be in barrels or sacks, the buyer to pay one-half of the same. And unless the flour in sacks is sewed and loaded in accordance with the recommendations of the Committee on Flour Inspection, the inspector will be entitled to charge for the labor necessary to put the flour in proper condition for inspection, a sum not to exceed $2 per car.

REGULATION IX.

REPORT OF STOCKS AND INSPECTIONS.

Stocks to be reported monthly.

It shall be the further duty of the Inspector to ascertain the stock of flour in Chicago on the first day of each month, and to report the same to the Secretary of the Association, to be by him posted upon the bulletin of the Exchange Room. In taking the account of stock there shall be included only the amount in the several freight depots, the public warehouses, and the places of storage by receivers, and in the city mills. The Inspector shall also furnish to the Secretary of the Association, monthly, a statement of the number of barrels and the number of sacks of flour inspected by him during the preceding month.

Inspections to be reported.

REGULATION X.

SAMPLES FURNISHED AND RETAINED BY INSPECTOR.

Inspector to furnish samples.

It shall be the further duty of the Inspector to furnish in the Exchange Room, each day before 12 o'clock noon, to the parties for whom the flour is inspected, the Inspector's sample or samples (if more than one grade in each lot) of each car or lot of flour that is inspected by him, said sample or samples bearing his official stamp upon the face of the bag. He shall also retain duplicate samples of all flour inspected by him for sixty days from the time of inspection; and, on the request of either buyer or seller, shall preserve the sample for a period not to exceed four months.

Samples to be retained.

REGULATION XI.

APPEALS.

Appeals.

In case either the buyer or seller is dissatisfied with the inspection of flour, he shall have the privilege of taking an appeal to the Committee on Flour Inspection, upon paying the fee of five dollars for every appealed case; this fee to be paid to the Secretary of the Board by the party making the appeal, at the time the appeal is made; such fees to be paid by the Secretary to the committee, in case the Inspector is sustained, but in case the Inspector is not sustained, the fee shall be refunded to the applicant for the appeal. The samples, without name or date, shall be furnished by the Inspector, who shall state the cause of appeal. Neither buyer nor seller shall be represented before the committee, and the decision of a majority of the committee shall be final.

REGULATION XIII.

REPEAL OR AMENDMENT OF REGULATIONS.

No change shall be made in these regulations or recommendations by the Board of Directors before submitting the same to a meeting, properly called, of the members of the Board of Trade that are interested in the flour trade, in which ten shall constitute a quorum. Repeal or amendments.

RECOMMENDATIONS.

I.

The Committee on Flour Inspection recommend to millers and shippers of flour the following requirements of standard sacks: Flour in sacks, requirements.

NO. 140—JUTE EXPORT SACKS

Shall be from the best material, double stitched, not using less than an equivalent to 40x49 inch mangled or craped finished material, weighing not less than 12 ounces per yard of 40 inches in width, or 15 ounces for the complete bag. If from starched or sized material, the complete bag should not weigh less than 16 ounces.

NO. 280—JUTE EXPORT SACKS

Shall be from the best material, double stitched, not using less than an equivalent to 50x63 inch mangled or craped finished material, weighing not less than 15 ounces per yard of 50 inches in width, or 25 ounces for the complete bag. If from starched or sized material, the complete bag should not weigh less than 26½ ounces.

Seamless jute sacks must be from same weight and quality of material, etc., but require 4 per cent. less material, and may weigh 4 per cent. less.

140 POUND COTTON EXPORT SACKS

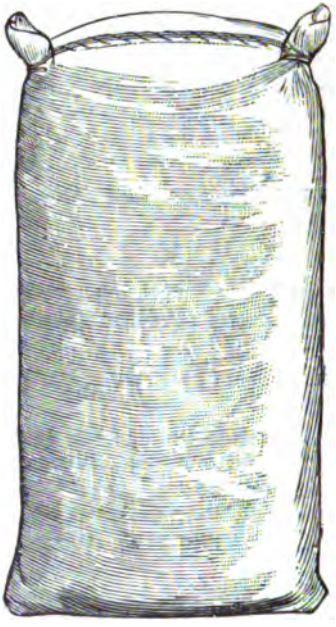
Shall be double stitched, best Twill Drill, Osnaburg or Duck, free from starch or sizing, using of Twill or Drill not less than an equivalent to 40x47 inches, or, if Osnaburg or Duck, not less than 37½x51½ inch material, the complete bag weighing not less than 9½ ounces.

II.

How to close sacks.

The Committee on Flour Inspection also recommend to millers and shippers of flour in sacks to be inspected in this market, that in closing the sack the mouth edge of the sack be turned in without rolling, and sewed with a single seam, the stitches to be at least 1½ inches apart. (See Fig. 1.) This will allow the Inspector to insert the trier between the stitches without making holes in the cloth.

FIG. 1.



III.

How to load sacks.

The Committee on Flour Inspection further recommend to millers, shippers of flour, and railway agents, that in loading cars the following instructions be observed:

One hundred and forty pound sacks should be piled in two tiers lengthwise of the car, the mouths of sacks placed toward center of car (see Fig. 2), leaving the space between the tiers of sacks in the center of the car free and clear for the convenience of the Inspector.

The sacks of flour should be piled as follows: The sacks on the floor to be placed four inches from the side walls of car, and sacks so piled as to gradually incline to the walls of the car until the top rows press strongly against the said walls, as shown in Fig. 2.

FIG. 2.

Unless these recommendations be complied with the Inspector will charge for the labor necessary to put the flour in proper position for inspection.

Branding.

Reg. 8. Should the Inspector be called upon to inspect pickled meats, and upon examination he should be of the opinion that the number of pounds required by these Rules had not been originally packed, he shall not pass them as Standard, but shall refer the matter at once to the Committee on Provision Inspection, who shall investigate, and if a satisfactory explanation can be given or arrived at, they shall instruct the Inspector to proceed and inspect and pass them; but if not satisfactory to the committee they shall, in their judgment, make the fact known to the Association in any way they may think most proper.

All the foregoing regulations, and the requirements as to the cutting and packing of hog products, must be justly and liberally construed, and no property shall be rejected or condemned on mere technicalities; but this shall not be regarded as giving license to departure from their general spirit and intent.
